Cell Extraction

STC Certified, (8 hours)

Tuition Not to Exceed \$110

This highly interactive one-day course provides students with the tactical skills necessary to conduct cell extractions on inmates/wards. This class will standardize extraction techniques, enhance professionalism, and reduce agency liability and injuries to staff as well as inmates/wards. A substantial amount of class time is reserved for scenario training and hands-on application of the various techniques covered.

- Situations when cell extractions are necessary
- Advantages of modern cell extractions
- 5 step compliance technique
- Cell extraction key considerations
 - Hazards
 - Protective gear
 - Standard team member equipment
 - Team member positions and roles
- Tactical principles and tactical planning
- After action requirements: Debrief, document, decontaminate and clean-up
- Hands-on application and scenario training

Todd Dearmore began his career with the Kern County Sheriff's Department in 1994. His assignments have included correctional security, administration, and training. He also served as the Sheriff's Emergency Response Team's (SERT) Operations Sergeant and has been involved in hundreds of SERT operations including riots, cell extractions and high-risk inmate transports among others.

In addition, Sergeant Dearmore is an instructor for Taft College and is regularly invited to lecture and provide training at law enforcement seminars and conferences.

He holds a BS degree in business management and is a graduate of the POST Command and SWAT Team Leader training courses. Since 1994 he has acquired over 2,250 hours of work related training.

“At the end of the 9-hour course, every single participant – from officers to defensive tactics instructors, SWAT officers, field sergeants and lieutenants – felt they had learned valuable skills and could manage a real world cell extraction. It was some damn fine training!”
