

Law Enforcement Response to Civil Unrest for Supervisors

This specialized course equips law enforcement supervisors with the critical knowledge and skills to effectively manage civil unrest events within the framework of the Incident Command System (ICS). Participants will learn to integrate intelligence gathering, crowd management and control strategies to enhance operational effectiveness while ensuring compliance with current legal standards.

Through real-world case studies and scenario-based training, supervisors will develop the ability to assess evolving situations, make informed decisions, and mitigate liability in high-pressure environments. This course emphasizes the importance of understanding crowd dynamics, intelligence-driven decision-making, and accountability to improve public safety outcomes and maintain community trust.

Join us to strengthen your agency's preparedness and response capabilities in complex civil unrest incidents.

THERE IS NO COST TO ATTEND THIS COURSE.
